ASI Prelim Exam

Requirement for Prelim

1. You have to submit one put, one get, one post, and one delete.
2. The instruction said that you can no longer use the get issue and post issue (since it was part of the activity) and find other APIs that you can demo.
3. You have to identify the full URI and the request content (HEADERS, BODY).
4. Record that the APIs are working.

Scoring: (60pts overall)

- Properly cited HTTP endpoint
- Documented HTTP Content and Headers
- Successful execution through video recording

Submission:

- Individual submission but do it by pair. (Iisa lang gagawin, pero submission twice – isa sa iyo, isa sa partner)
- Deadline: TBA (Makikita sa canvas, one day after the actual schedule of Prelim Exam)

Clarifications:

- No need to open cam for the recording
- Record only the execution, no need to record the step-by-step process.
- Choose an API that is unique from your classmates (BAWAL MAY KAPAREHAS, IF MERON DEDUCTION)
- No documentation to be submitted
- If the API executed, show the JIRA's UI Interface (in the recorded submission). For example, POST method, it will create a new issue in the UI.
- Next week, nag eexpect si Sir na may dalang Starbucks ang 401 /jk
